Recipient has marked complete all of the on-the-job tasks assigned in the 4-week Scenario Design Live course offered online by Cathy Moore. Skills practiced include:

- Performance consulting to clarify the business need for the project, help stakeholders focus on changing behavior, and find non-training solutions
- Task analysis at a deep level to specify the decisions that people need to make and the issues that make those decisions challenging
- Determining which practice activities are appropriate and which format(s) would be most effective
- Writing challenging and realistic stems, options, and feedback for one-scene and branching scenarios that reproduce the challenges faced on the job and help people learn from realistic consequences
